## General information about the ATN 4.6.5 Compatibility guide

### **Note:**

*Time Navigator 4.6.x Agents are fully supported with Time Navigator 4.6.5 Server.*

*“★” Indicates certified with the latest version of ATN 4.6.5 (unless specified otherwise).*

*“★” Indicates this operating system and/or application will be deprecated for future versions of Time Navigator. See our “Legacy” section at the end of the Compatibility Guide for more details.*

*“○” Supported - known to work but has not been fully tested.*

*“□” Available on demand*

## Co-residence with other Atempo products

It is generally safe to install components from other Atempo products on the same host as Time Navigator, provided the host has sufficient processor, memory, storage, and network resources to support the combined load and the product versions are at least as current as the following:

### **NOTE:**

Running multiple product components on the same host is not recommended in production environments. Like any business-critical application, Atempo products will perform best when run on dedicated hosts. Furthermore, troubleshooting issues with co-resident applications can be extremely complex, which may result in reduced service level. This section refers only to co-residence and not to interoperability with other Atempo products.

## Automated Library Management

## Support Lifecycle

End of Support (EOS) date is the last date on which Atempo will deliver standard support services for that version/release of a product. EOS means the software is no longer available for download. Customers may continue to install and use the version but Atempo will no longer keep these versions online.

Time Navigator patches on Service Packs will be maintained for 3 months following new major/minor release or service pack release. Fixes will be applied to the most recent service pack and/or next version. We do not engage ourselves to provide patches to the same service pack as installed at the customer site.

“End of Support” implies:

- Version no longer available for download from ISP
- No patch or service pack will be provided for that version
- Support will no longer open tickets for that version, except for ‘legacy’ platforms and applications outlined in the Compatibility Guide.

“Superseded” implies support will still open tickets, but fixes/patches will only be provided on the latest version.

### Extended support

In some circumstances customers may require support for products that have officially been marked “end of support”. Atempo may in exceptional circumstances agree to extend support.

The table below outlines essential information regarding Atempo Data Protection lifecycle policies in order to help you plan for future upgrades.
